Standard Notes: - Represents zero. (D) Withheld to avoid disclosing figures for individual companies. (NA) Not available. (X) Not applicable.
 Represents the clean-coal equivalent of all coal mined, based on the location of the mine. Includes small tonnages of coal produced in other industries.
 Service companies were permitted to prepare one report for all mining services performed. The totals shown for number of establishments in this table, and all figures shown for number of establishments in other tables of this report, are the counts of these reports. The Division and State total figures for all other items are based on the classification of these reports by the principal State in which services were performed. However, these reports contained data for the total receipts for services, total employment, tonnage of raw coal mined, and capital expenditures by county. All other county information for this industry was obtained by allocating the totals reported for each establishment on the basis of the reported county data. The number of establishments shown by county represents the number of operations in separate counties.

Coal mined by the Bituminous Coal Mining Services Industry is included in the production shown for the Bituminous Coal and Lignite Industries.

Represents establishments in the Bituminous Coal and the Bituminous Coal Mining Services Industries.

Represents the Bituminous Coal Industry only. No establishments in the Bituminous Coal Mining Services Industry were reported in the county.

Excludes the Bituminous Coal Mining Services Industry.
